1. About this plugin

Open Badge Factory is a cloud platform that provides the tools your organisation needs to implement a meaningful and sustainable Open Badges system.

This [local_obf plugin](#) enables users to:

- Issue badges created in [Open Badge Factory](#) to students
- Create badge awarding rules: based on course completion, based on activity completion, or on profile completion
- Get badge awarding history
- Display earned badges on profile and connect the Open Badge Passport backpack

Important: to use this plugin you need a Premium or Pro account.

Please note that you can only generate OAuth2 API keys with a Pro account.

We recommend using OAuth2 keys when possible as legacy API keys can be used with Premium but Open Badge Factory will not provide any support.

Multitenancy:

- You can [connect multiple OBF accounts](#) to your Moodle site using OAuth2 API keys.
- You can connect one OBF account to multiple Moodle sites.

This plugin can be used for [CanCred Factory](#) (powered by Open Badge Factory).

2. Connecting Open Badge Factory to Moodle

2.1. Plugin installation

To install the plugin, login to your Moodle site as a Site Administrator. Then navigate to Site Administration > Plugins > Install plugins, you can either:

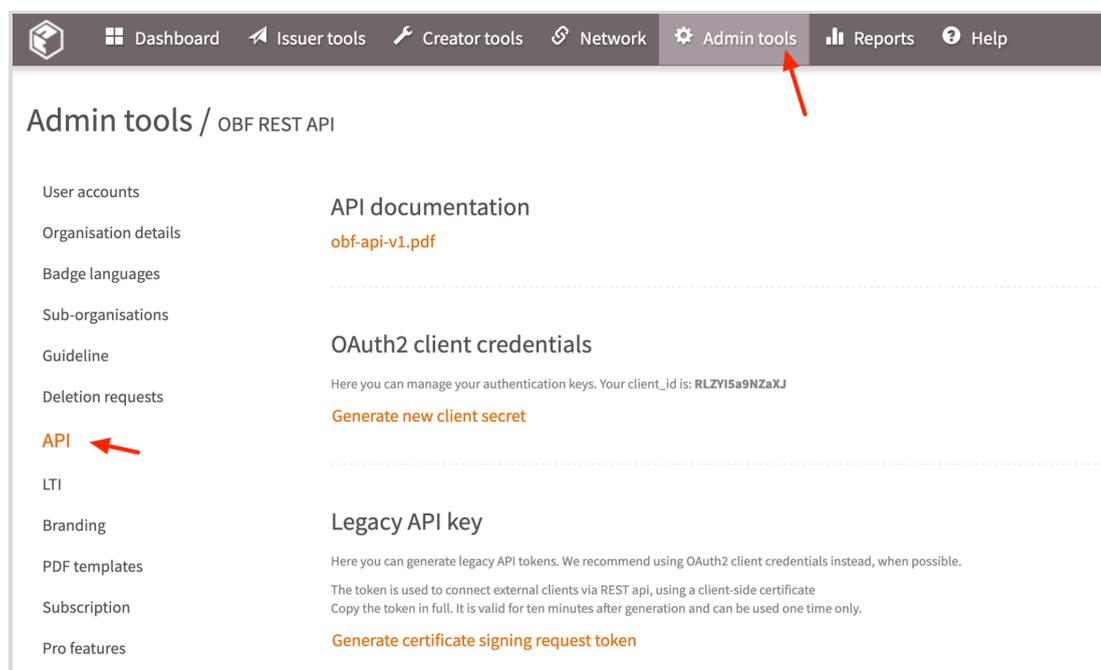

- Install the Plugin Directly from the Moodle Plugins Directory
- Or manually Install the Plugins from ZIP File (available on https://moodle.org/plugins/local_obf)

Once the plugin is installed, you can access the plugin configuration and connect your OBF account with your Moodle site on Site Administration > Open Badges:

2.2. Establishing a connection to OBF

You need to generate an API key from OBF. Log in to Open Badge Factory and go to Admin tools > API

Legacy API key for Premium account:

You must first generate your token, click **Generate certificate signing request token**:

Legacy API key

Here you can generate legacy API tokens. We recommend using OAuth2 client credentials instead, when possible.

The token is used to connect external clients via REST api, using a client-side certificate
Copy the token in full. It is valid for ten minutes after generation and can be used one time only.

[Generate certificate signing request token](#) 

Copy the generated token:

Legacy API key

Here you can generate legacy API tokens. We recommend using OAuth2 client credentials instead, when possible.

The token is used to connect external clients via REST api, using a client-side certificate
Copy the token in full. It is valid for ten minutes after generation and can be used one time only.

```

[Generate certificate signing request token](#) 

Log into Moodle as a Site Administrator and add the API key you copied from OBF to **Site administration** → **Open Badges** → **Settings** and click **Add new legacy API connection**

obfpartners Home Dashboard My courses **Site administration**

Open Badges / Settings

General **Users** Courses Grades Plugins Appearance Server Reports Development

Select API authentication method. OAuth2 is preferred on Pro subscription level.

[Add new OAuth2 API connection](#) [Add new legacy API connection](#) 

Paste your token and click **Authenticate**

Open Badges / Export settings

General Users Courses Grades Plugins Appearance Server Reports Development

Legacy API connection settings

Certificate needs to be generated before Open Badge Factory can be used with Moodle. Log in to Open Badge Factory to get the request token and paste it to the field below. ✕

URL ? Edit

OBF request token ?

Your OBF account is now connected to your Moodle!

Open Badges / Export settings

General Users Courses Grades Plugins Appearance Server Reports Development

Legacy API connection settings

OBF connection is up and working. The client certificate expires in **2026-09-14**. ✕

OAuth2 key for Pro account:

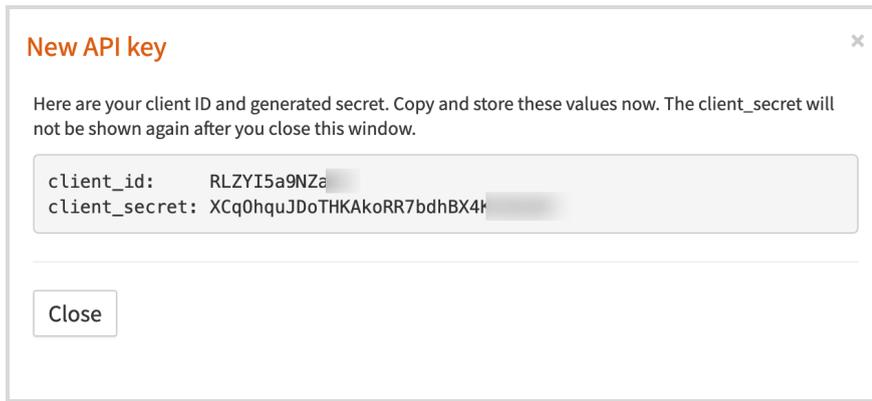

You must first generate your key, click **Generate new client secret** and set a description for your new key:

New API key ✕

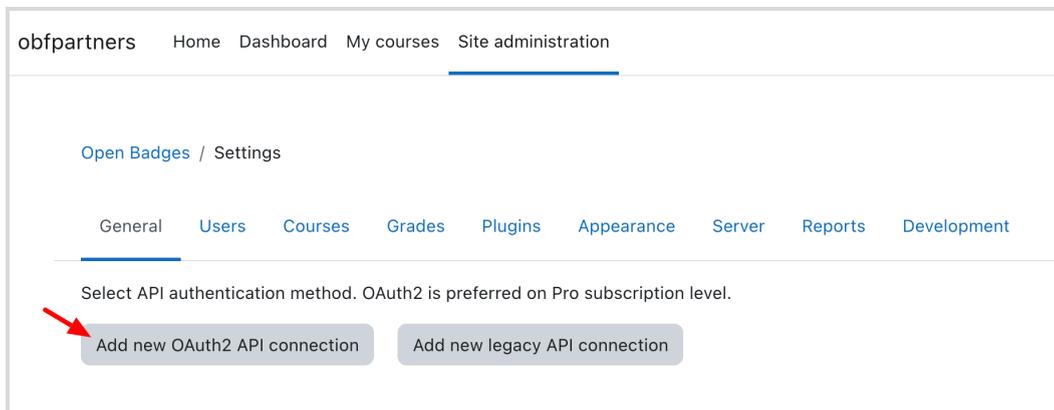

Key description

Give this key an informative description that helps you identify it later.

Click **Generate** and copy the generated client_id and client_secret::

Log into Moodle as a Site Administrator and add the API key you copied from OBF to Site administration → Open Badges → Settings and click Add new OAuth2 API connection

Paste your client_id and client_secret, set roles authorised to issue badges and click Add new client :

obfpartners Home Dashboard My courses Site administration

Open Badges / Settings

General Users Courses Grades Plugins Appearance Server Reports Development

▼ **Client**

API URL ! ?

Client ID ! ?

Client secret ! ?

▼ **Issuer roles**

Authorize roles to issue badges for this client:

- manager
- coursecreator
- editingteacher
- teacher

Here you can define where badges will be available, by matching OBF categories with Moodle categories. By default, without specific rule, your OBF badges will be available on all your Moodle categories.

Congrats! Your OBF account is now connected to your Moodle!

obfpartners Home Dashboard My courses Site administration 🔔 🗨 👤 Edit mod

Open Badges / Settings

General Users Courses Grades Plugins Appearance Server Reports Development

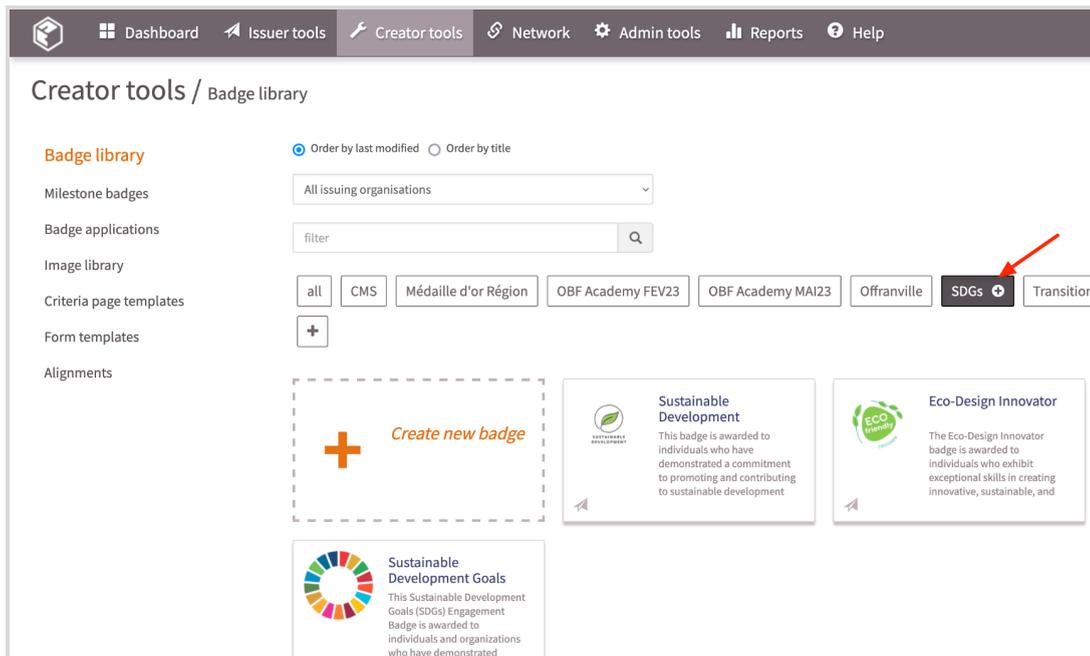

Client name	API URL	Client ID	Client secret	Actions
<input type="text"/>	https://openbadgefactory.com	RV5JHQaF93a	*****HQM	<input type="button" value="⚙"/> <input type="button" value="🗑"/>

Note that Pro customers can set several clients here, connect multiple OBF to this Moodle ([see video](#)).

2.3. Set badge permissions (pro only)

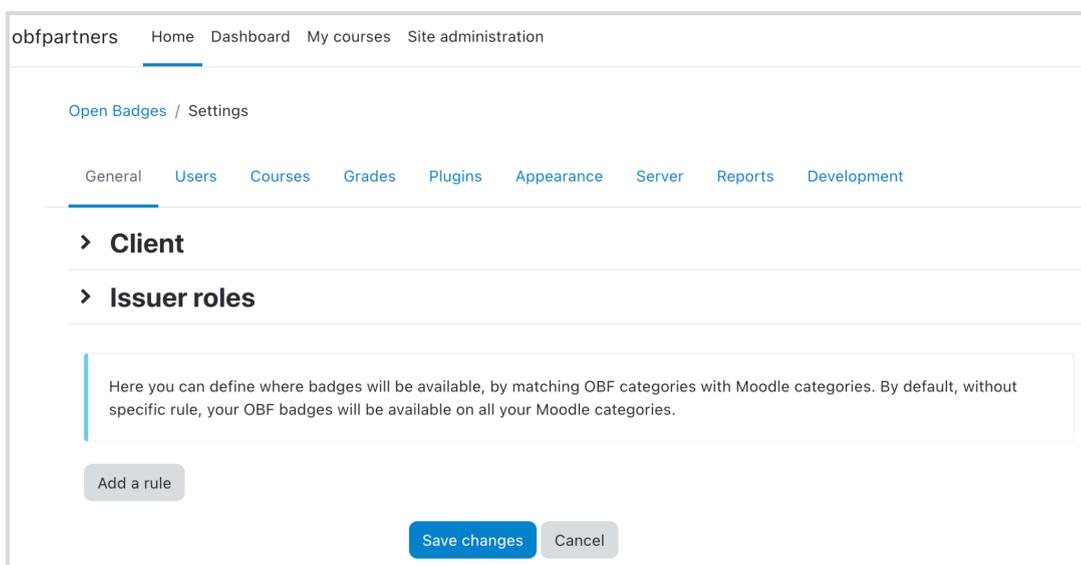

For each Oauth2 client, you can set specific badge permissions on Moodle categories (link OBF categories with Moodle categories).

For instance, you have classified some badges in OBF, into a “SDGs” category:

And you want to make those badges available into the related SDGs course category in Moodle.

You can add a specific rule. Edit your client and click the **Add a rule** button:

Then choose your Moodle category.ies, and match with your OBF category.ies:

Rules 1

Choose your moodle categories x SDGs

Search ▼ 

Choose your OBF categories x SDGs

Search ▼ 

[Delete this rule](#)

Here you can define where badges will be available, by matching OBF categories with Moodle categories. By default, without specific rule, your OBF badges will be available on all your Moodle categories.

[Add a rule](#)

 [Save changes](#) [Cancel](#)

Repeat those steps to add a new rule.

Important:

- A specific rule will be applied to all related Moodle child course categories.
- Without any specific rules, your OBF badges will be available on all your Moodle categories.

2.4. Other advanced settings

You can configure advanced settings:

Settings

Disable badge assertion cache 

Delete awarding rules when course is reset.

Display of user badges Users can choose to display badges ▼

Badge issuing events Show only badges issued from this system ▼

[Save](#)

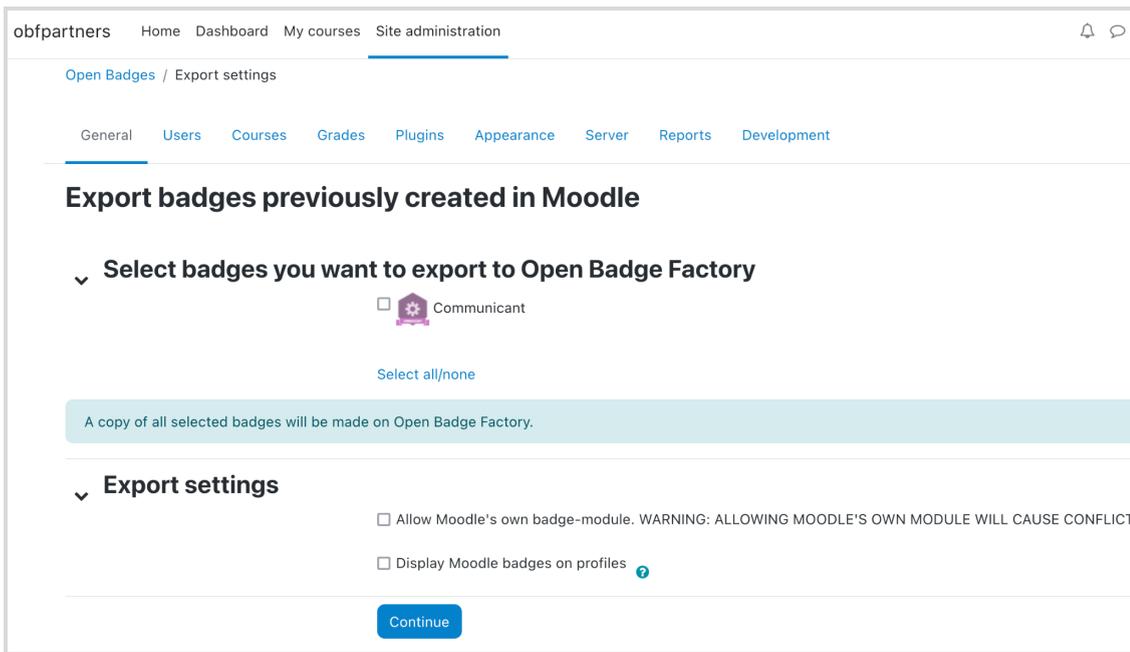

- **Disable badge assertion cache:** badges on profile will not be cached, they'll appear on profile without delay. Note that this could affect the profile page loading performance.
- **Delete awarding rules when course is reset:** for each course you'll reset, all badges associated rules will be removed

- **Display of user badges:** you can define if:
 - Badges are displayed by default on profile pages
 - Badges are not displayed on profile pages
 - Users can decide if they want to display their badges on profile page
- **Badge issuing events:** you can specify if all badges events issued with OBF are displayed in the Awarding history, or only events related to your Moodle installation.

2.5. Exporting Moodle badges

If Moodle's own badges are found in the system, they can be exported to OBF. The exported badges are visible to everyone using the API (e.g. users in Moodle). Additionally, it is recommended that Moodle's own badge system is disabled to avoid multiple badge views.

To export your Moodle badges to OBF, go to **Site administration** → **Open Badges** → **Export settings**

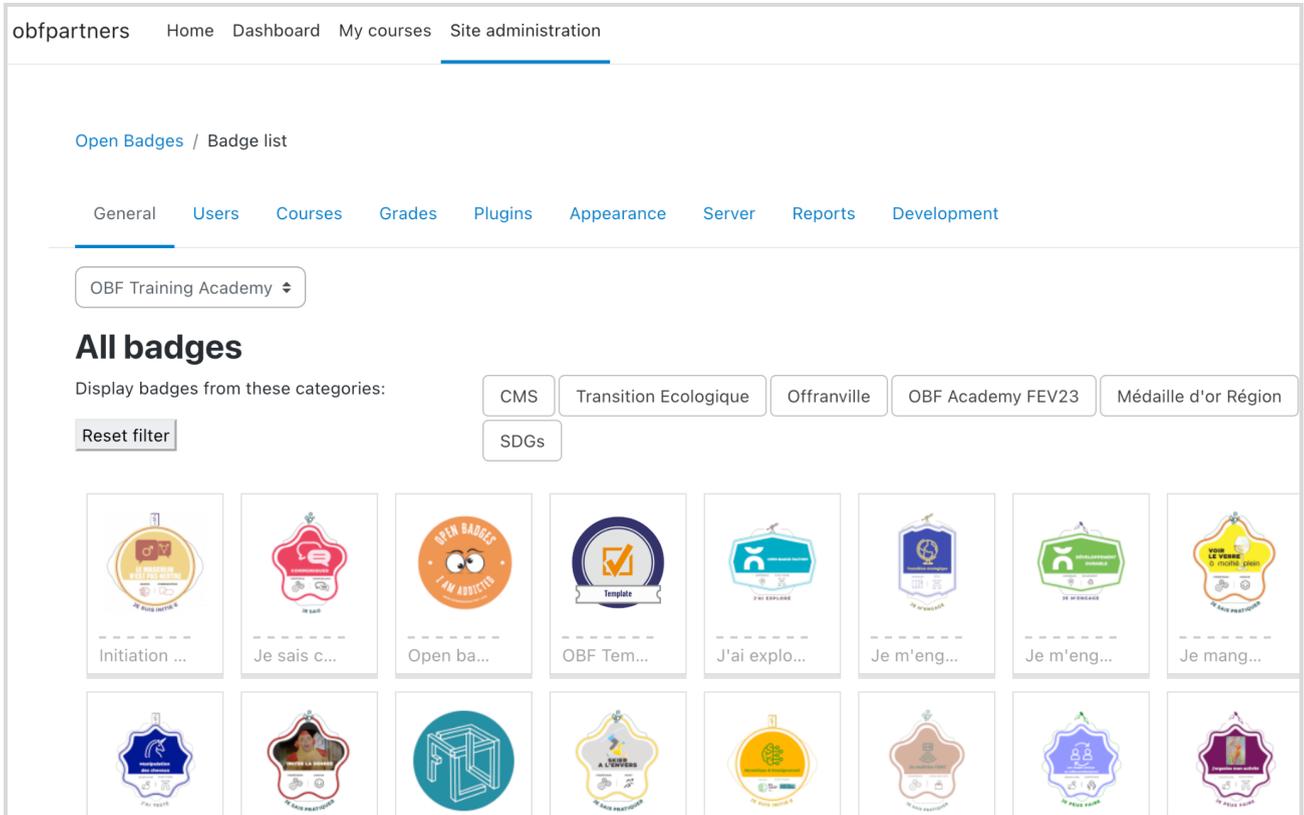

The screenshot shows the Moodle administration interface for the 'Open Badges' plugin. The breadcrumb trail is 'obfpartners > Home > Dashboard > My courses > Site administration > Open Badges > Export settings'. The page title is 'Open Badges / Export settings'. A navigation menu includes 'General', 'Users', 'Courses', 'Grades', 'Plugins', 'Appearance', 'Server', 'Reports', and 'Development'. The main heading is 'Export badges previously created in Moodle'. Below this is a section titled 'Select badges you want to export to Open Badge Factory' with a dropdown arrow. It contains a single badge named 'Communicant' with a gear icon and a checkbox. A link 'Select all/none' is visible. A light blue message box states: 'A copy of all selected badges will be made on Open Badge Factory.' Below this is the 'Export settings' section with two checkboxes: 'Allow Moodle's own badge-module. WARNING: ALLOWING MOODLE'S OWN MODULE WILL CAUSE CONFLICT' and 'Display Moodle badges on profiles'. A 'Continue' button is at the bottom.

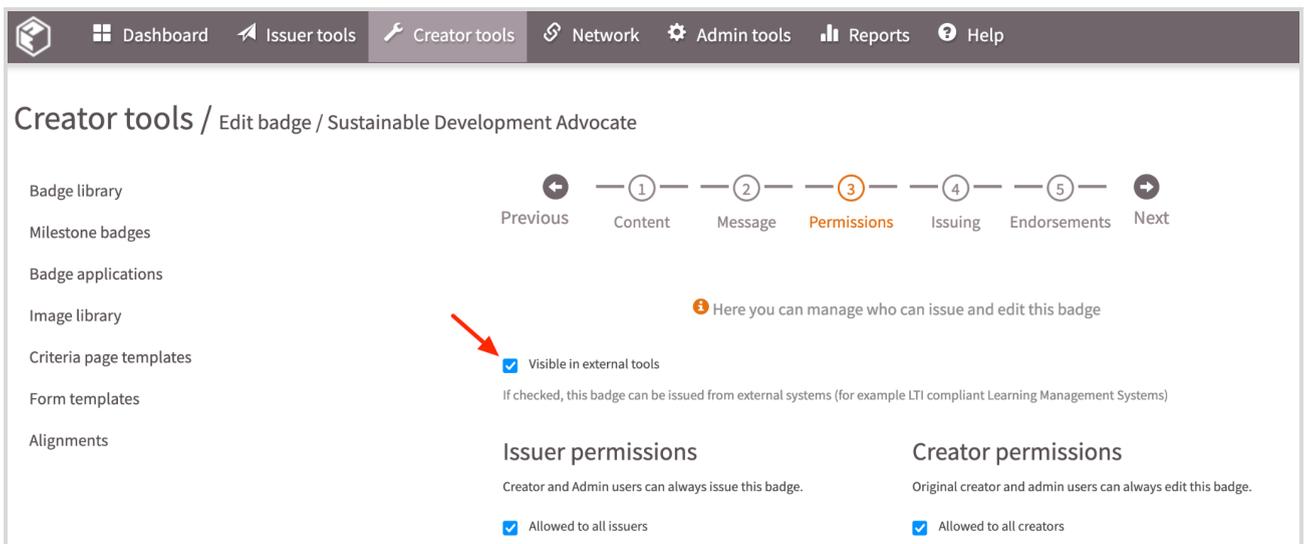

Select the Moodle badges you want to export to Open Badge Factory. You can also disable Moodle's badges module and/or disable the displaying of Moodle badges on profiles.

2.6. Badge list

Now the badges from OBF are visible in **Site administration** → **Open Badges** → **Badge list**

Tip: badges can be excluded from this view, by unchecking the box **“Visible in external tools”** from your badge permissions in OBF > **Creator tools** > select your badge > **Permissions**:

By clicking the badge you can view its details, issue the badge to users, add awarding rules. You can also, edit the email template used when issuing the badge, and access the awarding history:

Badge details

Name Initiation aux enjeux d'inclusion dans la langue française

Description Un badge de savoir qui reconnaît l'initiation aux enjeux de la communication inclusive.

Created on 2021-09-13

Tags communication, inclusion, langage

Criteria Comment ne pas exclure d'une activité ou d'une pratique culturelle dès la communication sur un événement ? Comment s'assurer que les man culturels qui se réclament "tous publics" ne se contredisent pas dès la communication et leurs premiers écrits ? Comment faire en sorte que d rencontré, dès la première affiche vue, dès la première conversation, chaque personne se sente réellement bienvenue ?

Ce badge reconnaît que la personne bénéficiaire connaît des éléments de l'histoire de la langue française du point de vue du genre. Elle a pris l'invisibilisation volontaire des femmes dans la sphère publique à travers des usages linguistiques imposés et conscients au cours des XVIII et reconnaît que la personne bénéficiaire est initiée aux enjeux de la communication inclusive.

[Issue badge](#)

2.7. Set displayer badge source

By default, the Open Badge Passport displayer will be configured:

[Open Badges](#) / [Displayer badge source](#)

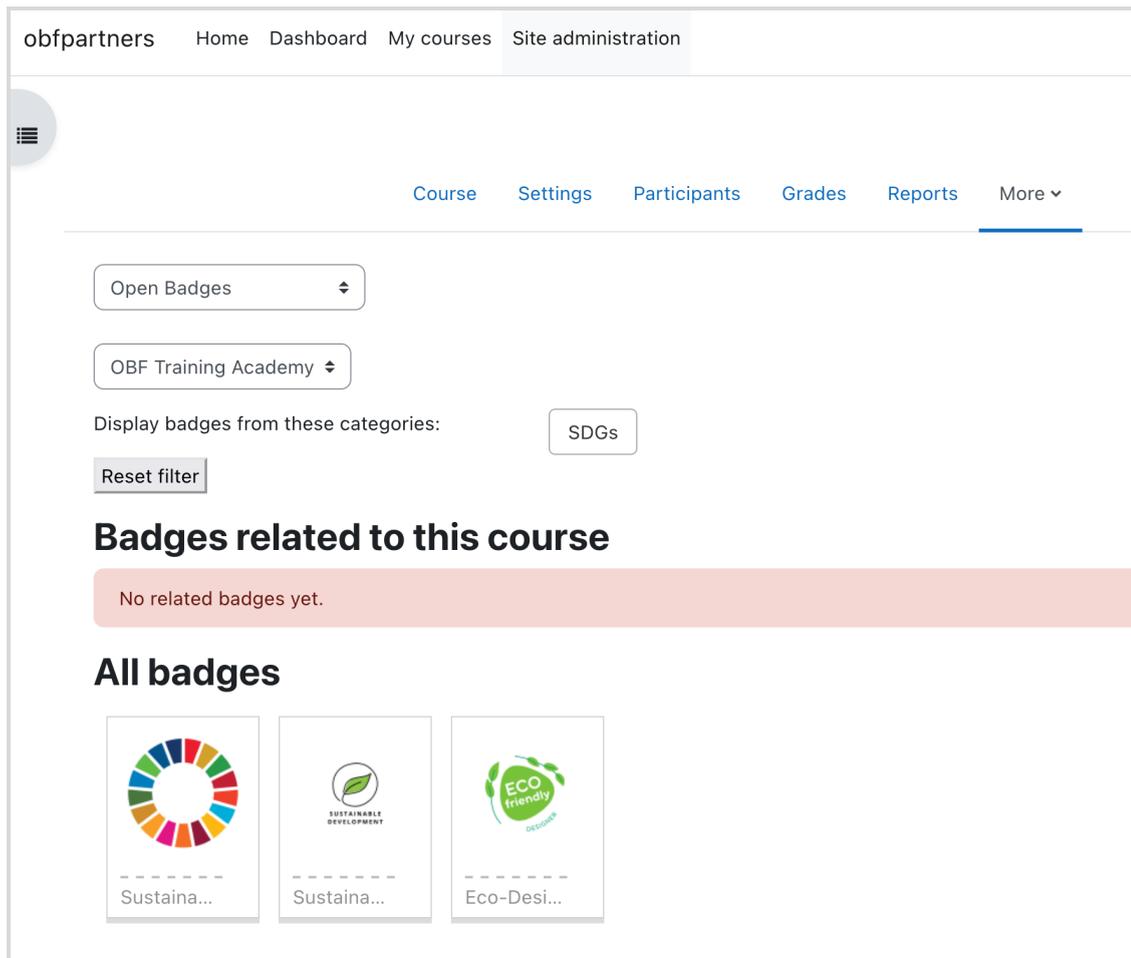

[General](#) [Users](#) [Courses](#) [Grades](#) [Plugins](#) [Appearance](#) [Server](#) [Reports](#) [Development](#)

Displayer badge source

Short name	Full name	URL	User can define the email-address	Actions
obp	Open Badge Passport	https://openbadgepassport.com/displayer/	Yes	Edit

3. Usage

If you are in a teacher role in Moodle you can manage the badges of your course by first choosing a course (where you are in a teacher role) and going to Course → **Course administration** → **Open badges**. Here you can see a similar view which can be seen in site administration, see badges that are related to course and create new awarding rules.

The screenshot shows the Moodle Open Badges management interface. At the top, there is a navigation bar with 'obfpartners' and 'Home Dashboard My courses Site administration'. Below this is a course navigation menu with 'Course Settings Participants Grades Reports More'. The main content area has a dropdown for 'Open Badges', a dropdown for 'OBF Training Academy', and a section for 'Display badges from these categories:' with a 'SDGs' button and a 'Reset filter' button. Below this is a heading 'Badges related to this course' followed by a message 'No related badges yet.' and another heading 'All badges' with three badge thumbnails: 'Sustaina...', 'Sustaina...', and 'Eco-Desi...'.

By clicking the badge you can see the badge details. In a course badge view a teacher can edit only those awarding rules which apply to the chosen course. Note that if a badge has awarding rules which apply to several courses, including the chosen course, an awarding rule cannot be added or edited within the chosen course. Also, if a badge has been issued at least once according to a certain rule, the rule cannot be edited anymore.

3.1. Issuing a badge to course participants

By clicking "Issue badge" you can issue the selected badge:

Sustainable Development Goals (SDGs) Engagement Badge

Badge details

Awarding rules

Badge details

Name Sustainable Development Goals (SDGs) Engagement Badge

Description This Sustainable Development Goals (SDGs) Engagement Badge is awarded to individuals and organizations who have demonstrated outstanding achievement of the United Nations' 17 SDGs. Recipients of this badge have made significant contributions to promoting sustainable development, protecting the environment, combating poverty, and working towards a better future for all.

Created on 2023-07-21

Tags sdg, sustainability

Criteria To be eligible for this badge, candidates must meet the following criteria:

Commitment to SDGs: Candidates must show active engagement in working towards the achievement of the 17 SDGs, through concrete actions in their community, region, or on a global scale.

Positive Impact: Candidates should have demonstrated measurable positive impact in at least one area of the SDGs. This may include contributing to poverty eradication, access to education, gender equality promotion, environmental protection, health promotion, etc.

Sustainability: Actions undertaken by candidates must demonstrate a sustainable and environmentally conscious approach, in line with the principles of sustainable development.

Innovation: Candidates who have adopted innovative and creative approaches to addressing SDG-related challenges will be highly valued.

Sharing and Awareness: Candidates must have contributed to disseminating knowledge and raising awareness about the SDGs, inspiring others to join this cause.

Collaboration: Candidates who have collaborated with other stakeholders, such as organizations, local governments, or businesses, to implement projects will also be considered favorably.

Validation:
The awarding of this badge will be carried out by an evaluation committee comprising experts in sustainable development and the SDGs. Candidates must submit a comprehensive portfolio detailing their actions and impact, along with testimonials from third parties confirming their commitment and achievements.

Issuing a badge automatically on profile completion

You can also define what user profile fields need to be completed to get the badge:

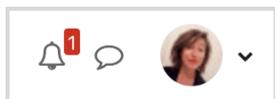

The screenshot shows the 'Awarding rules' configuration page for the 'Sustainable Development Goals (SDGs) Engagement Badge'. The page has a navigation bar with 'Course', 'Settings', 'Participants', 'Grades', 'Reports', and 'More'. Below the navigation bar, the badge title is displayed. Two tabs are visible: 'Badge details' and 'Awarding rules'. Under the 'Awarding rules' tab, there is a section titled 'Profile' with a dropdown arrow. This section contains a list of profile fields, each with an unchecked checkbox: First name, Last name, Email address, Address, Phone, Mobile phone, [[icq]], [[skype]], [[yahoo]], [[aim]], [[msn]], Department, Institution, Description, City/town, URL, and Country. At the bottom of the form, there are two expandable sections: 'Review rule after saving' and 'Criteria addendum'. A blue 'Save changes' button is located at the bottom right of the form.

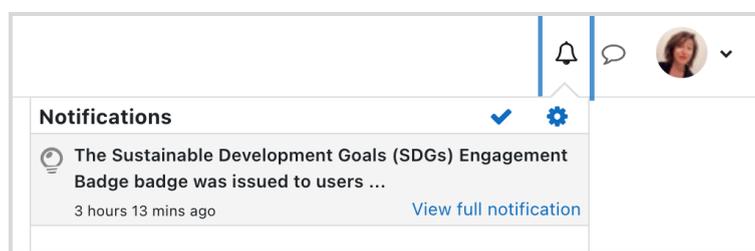

After the rule has been saved it can be seen on the Awarding rules tab in the badge's details.

3.3. Notifications

Notifications alert teachers, students and other users about events in Moodle. New notifications are highlighted with a number in the notifications menu at the top of the screen:

Clicking there displays any new notifications, along with the option to mark all as read, or to go to the notifications preferences page to change how notifications are received.

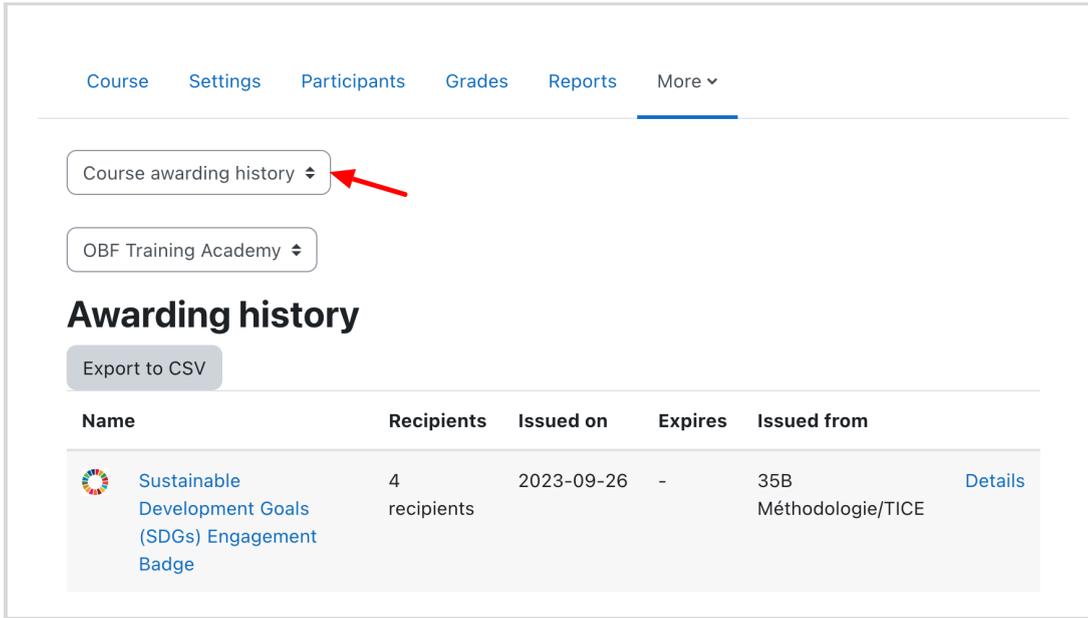

From the notifications preferences page, students can enable/disable internal notifications for new issued badges or revoked badges (no email notifications since emails are sent by Open Badge Factory). And teachers can be notified when a badge is issued / revoked to students in their course:

Open Badge Factory		
Issued badge is revoked	<input type="checkbox"/>	Locked off
New badge is issued	<input type="checkbox"/>	Locked off
New badge is issued to a student	<input type="checkbox"/>	Locked off
A student's badge has been revoked	<input type="checkbox"/>	Locked off

3.4. Awarding history

Once the badge has been issued to someone, the issuing event can be seen on the **Course awarding history** tab. You can access the issuing details and export your report in a CSV file.

Once the badge has been issued to someone, the issuing event can be seen on the **Course awarding history** tab. You can access the issuing details and export your report in a CSV file.

Name	Recipients	Issued on	Expires	Issued from	
 Sustainable Development Goals (SDGs) Engagement Badge	4 recipients	2023-09-26	-	35B Méthodologie/TICE	Details

3.5. Revoking a badge

Revoking a badge typically refers to the action of taking away or removing a badge that was previously awarded to an individual. There can be several reasons for revoking a badge: administrative error, Misrepresentation, Violation of Terms etc.).

From the awarding history view, click on **Revoke user badges**.

4. Displaying badge on user profiles

4.1. OBF badges issued in Moodle

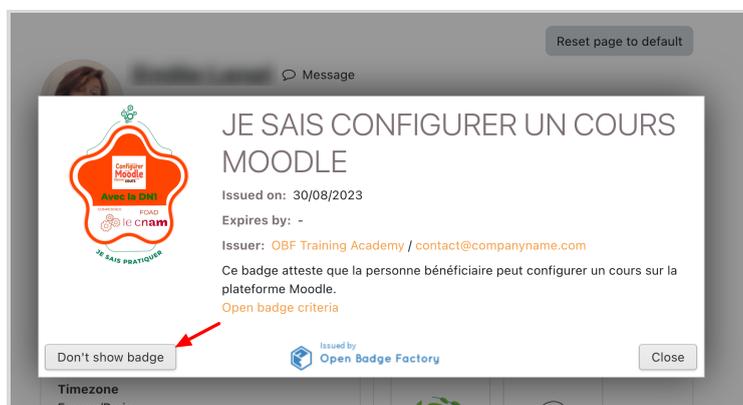

If you allowed badges to be displayed on profile pages (refer to [2.4](#)), then all OBF badges issued in your Moodle site will be visible on user profile pages:

The screenshot shows a user profile page with a 'Reset page to default' button at the top right. Below the profile picture and name, there is a 'Message' button. The profile is divided into several sections:

- User details:** Includes an 'Edit profile' link, 'Email address' (with a note '(Visible to other course participants)'), 'Country' (France), 'City/town' (Caen), and 'Timezone' (Europe/Paris).
- Privacy and policies:** Includes a 'Data retention summary' link.
- Course details:** Includes 'Course profiles' with links for 'Module OB - Lille' and 'Espace tuteurs - NCU'.
- Badges earned on OBF solutions partners:** A grid of six badges:
 - Top-left: Orange badge with 'Je sais c...'
 - Top-right: Purple badge with 'Je m'eng...'
 - Middle-left: Green 'Eco friendly' badge with 'Eco-Desi...'
 - Middle-right: White 'Sustaina...'
 - Bottom-left: Yellow badge with 'Initiation ...'
 - Bottom-right: Red badge with 'Je sais c...'

However, users can decide to hide part of their badges:

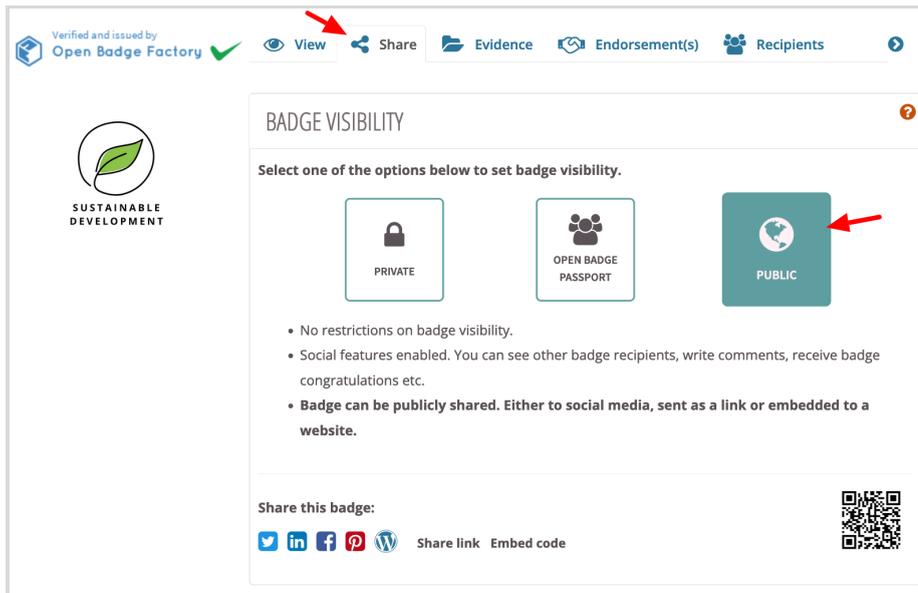

The screenshot shows a modal dialog for a specific badge. The badge is titled 'JE SAIS CONFIGURER UN COURS MOODLE' and was issued on 30/08/2023. The issuer is 'OBF Training Academy / contact@companyname.com'. The dialog text states: 'Ce badge atteste que la personne bénéficiaire peut configurer un cours sur la plateforme Moodle. Open badge criteria'. At the bottom left of the dialog, there is a 'Don't show badge' button with a red arrow pointing to it, and a 'Close' button at the bottom right. The background shows the user profile page with a 'Reset page to default' button at the top right.

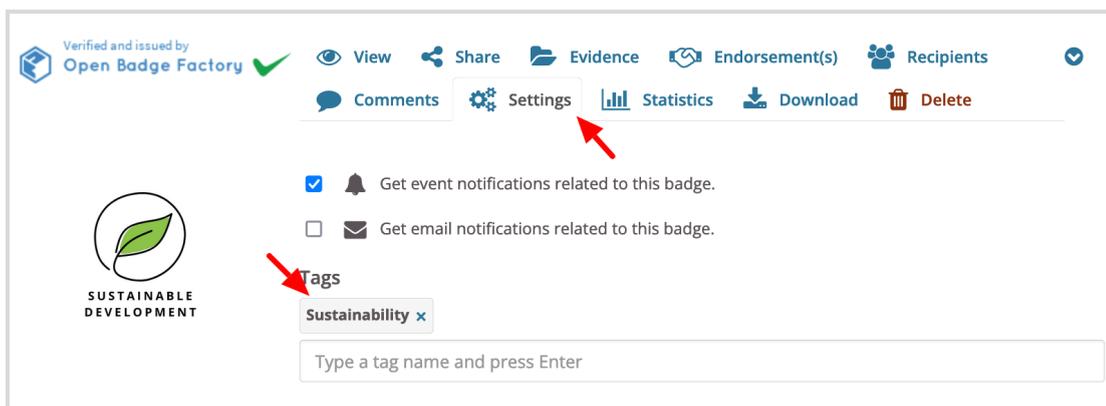

4.2. Open badge passport badges

[Open Badge Passport](#) is a free, easy to use service, where users can receive and store their Open Badges safely and share them with whomever they like and wherever they like.

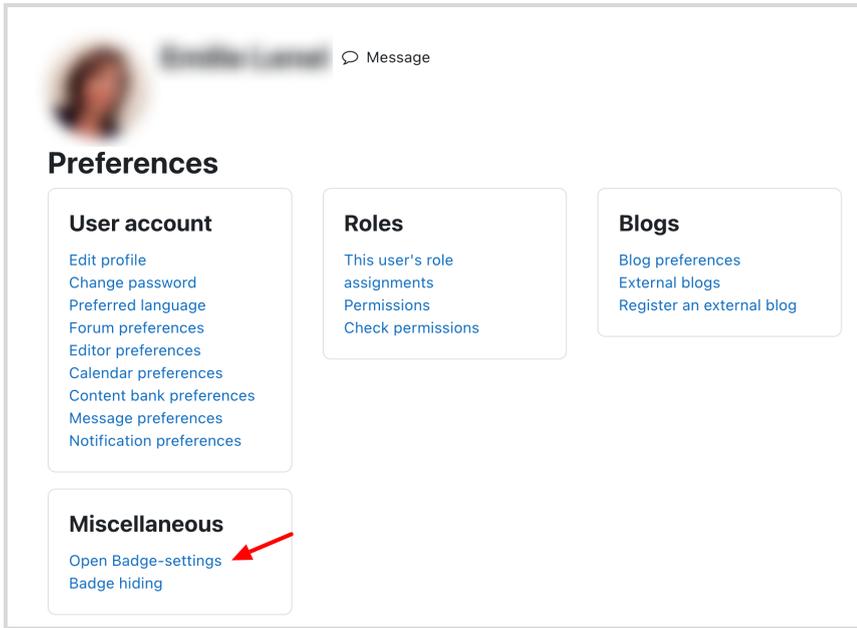

Within Open Badge Passport, users can set their badge visibility as public:

And organise their badges with tags:

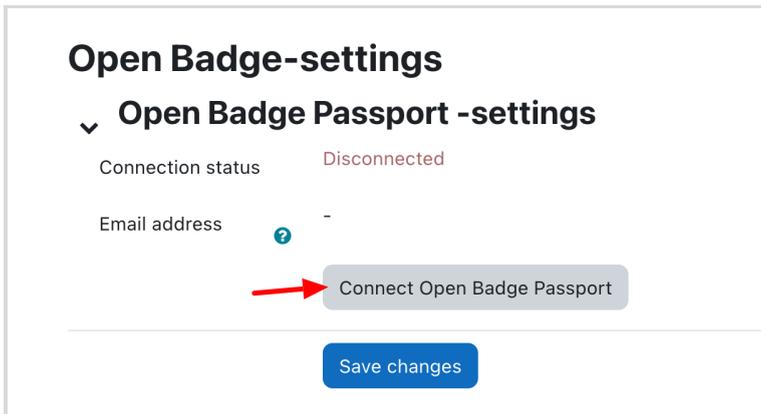

Users having an Open Badge Passport account can also display their badges on their Moodle profile. From their preferences > **Open Badge settings**:

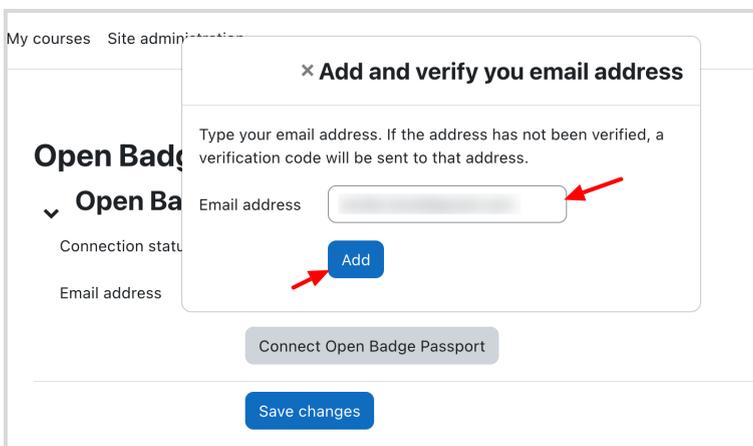

The image shows a user's profile page with a 'Message' button. Under the 'Preferences' section, there are three main categories: 'User account', 'Roles', and 'Blogs'. The 'User account' category includes links for 'Edit profile', 'Change password', 'Preferred language', 'Forum preferences', 'Editor preferences', 'Calendar preferences', 'Content bank preferences', 'Message preferences', and 'Notification preferences'. The 'Roles' category includes 'This user's role assignments', 'Permissions', and 'Check permissions'. The 'Blogs' category includes 'Blog preferences', 'External blogs', and 'Register an external blog'. A 'Miscellaneous' section is also present, containing 'Open Badge-settings' (highlighted with a red arrow) and 'Badge hiding'.

They can connect to their Open Badge Passport:

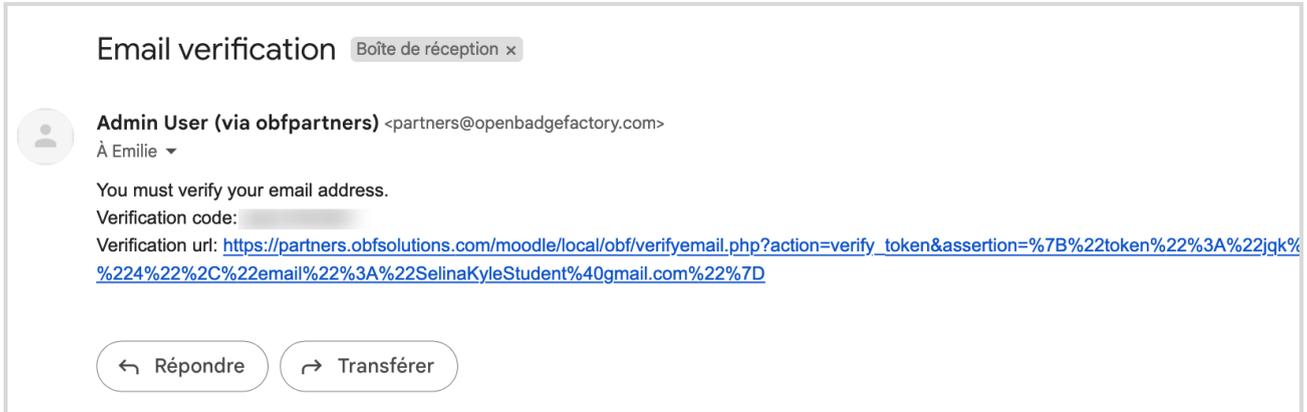

The image shows the 'Open Badge-settings' page. Under the 'Open Badge Passport -settings' section, the 'Connection status' is 'Disconnected'. The 'Email address' field is empty. A red arrow points to the 'Connect Open Badge Passport' button. Below this is a 'Save changes' button.

The user must provide their Open Badge Passport email address and add a connection.

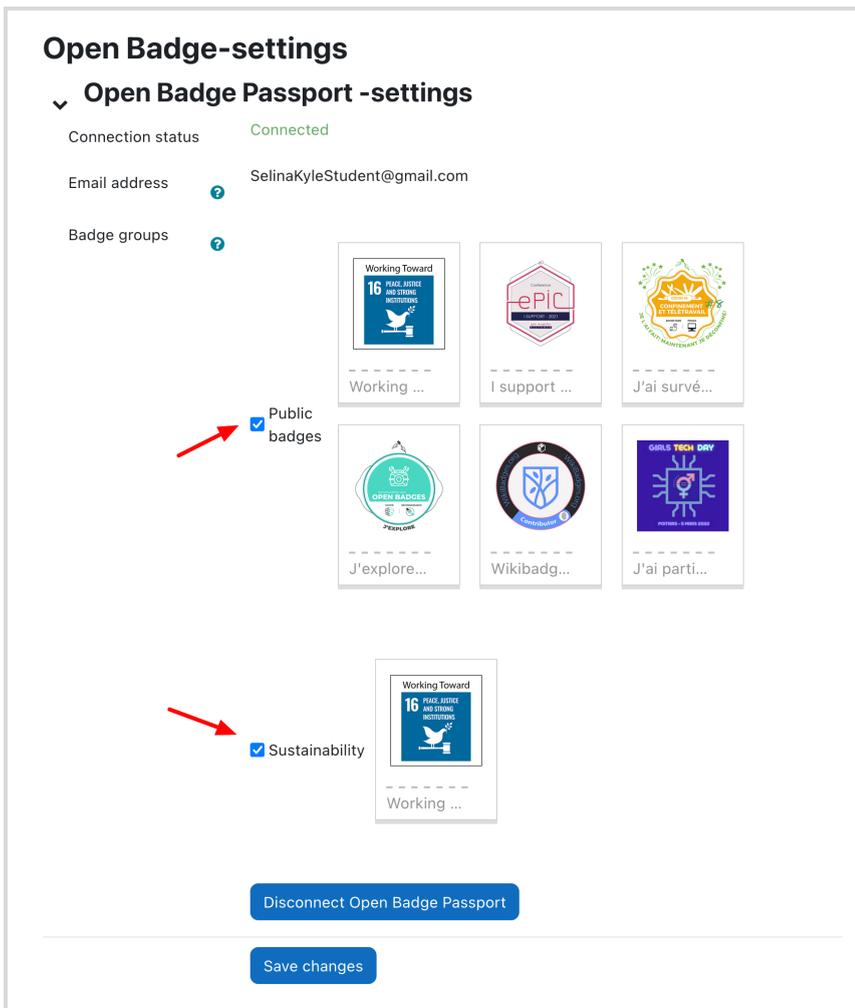

The image shows a dialog box titled 'Add and verify you email address'. It contains the text: 'Type your email address. If the address has not been verified, a verification code will be sent to that address.' Below this is an 'Email address' input field (highlighted with a red arrow) and an 'Add' button (highlighted with a red arrow). The dialog is overlaid on the 'Open Badge Passport -settings' page, which shows the 'Connect Open Badge Passport' and 'Save changes' buttons.

A verification email will be sent to the provided address:

Once the Open Badge Passport is connected, the user can define what badge groups to make visible on his profile (can be all public badges, or tagged badges):
